

Tips to help you check your orders

We have noticed that some orders are placed with duplicate entries, some intentionally, some not. We do not consider a duplicate entry an error, because a lot of customers place orders for multiple locations on the same order. Our shopping cart has a few features that make it easier to check your order before you submit it to us.

When you have finished with your order entries, and you are using the default settings for your billing, shipping, and payment methods, you jump directly to the final checkout step. If it's a small order and you're confident in your entries, you can submit the order and you're done. If you want to check your entries on a larger order, click on the "Remove Items From Cart" link shown in Figure 1 below:
